

HINDE CLASSES

Std X Mathematics (Level 1 – Standard) — Model Paper Breakdown

Question-wise map: Chapter • Marks • Type • Topic tested — based on Goa Board Design of SSC Final Exam Question Paper (2026–2027)

Section A Numbers & Algebra	Section B Geometry	Section C Trigonometry	Section D Mensuration & Data
---------------------------------------	------------------------------	----------------------------------	--

Q.No	Sec	Chapter	Marks	Type	Topic / Skill tested (short)
1	A	Real Numbers	1 mk	VSA	Express a number as product of primes
2	A	Real Numbers	1 mk	VSA	HCF given → find LCM (product of numbers rule)
3	A	Polynomials	1 mk	VSA	Form quadratic polynomial from given zeros
4	A	Pair of Linear Equations	1 mk	VSA	Solve simple pair (x+y, x-y form) → find ratio
5	A	Quadratic Equations	1 mk	VSA	Use discriminant value to find unknown coefficient
6	A	Arithmetic Progressions	1 mk	VSA	nth term from the end of an AP
7	B	Coordinate Geometry	1 mk	VSA	Section formula – find ratio of division
8	C	Introduction to Trigonometry	1 mk	VSA	Find one trig ratio given another
9	B	Circles	1 mk	VSA	Two tangents from external point – angle property
10	B	Circles	1 mk	VSA	Length of tangent from external point formula
11	B	Areas Related to Circles	1 mk	VSA	Circumference = Area (numerically) → find diameter
12	D	Surface Areas & Volumes	1 mk	VSA	Two cubes joined – surface area of resulting cuboid
13	D	Probability	1 mk	VSA	Identify a valid probability value
14	D	Logarithms	1 mk	VSA	Simplify using log laws (addition of logs)
15	A	Polynomials	1 mk	VSA	Relation between zeros and coefficients – find k
16	A	Arithmetic Progressions	1 mk	VSA	Three terms in AP – find next term
17	C	Introduction to Trigonometry	1 mk	VSA	Trigonometric identity – direct substitution
18	B	Areas Related to Circles	1 mk	VSA	Arc length → find radius (length of pendulum)
19	A	Pair of Linear Equations	1 mk	A-R	Assertion–Reason: condition for parallel lines
20	B	Triangles	1 mk	A-R	Assertion–Reason: converse of Basic Proportionality Theorem
21	B	Triangles	2 mk	SA-I	Similar triangles formed by diagonals of a trapezium
22	B	Coordinate Geometry	2 mk	SA-I	Distance / equidistant point – find unknown coordinate (OR)
23	C	Introduction to Trigonometry	2 mk	SA-I	Right triangle trig ratios / evaluate expression (OR)
24	B	Circles	2 mk	SA-I	Quadrilateral circumscribing a circle – find radius
25	D	Surface Areas & Volumes	2 mk	SA-I	Volume of combined solid (cone + hemisphere)
26	A	Real Numbers	2 mk	SA-I	Minimum number of articles for equal distribution (LCM)
27	A	Polynomials	2 mk	SA-I	Find zeros of quadratic polynomial & verify relation
28	D	Statistics	2 mk	SA-I	Median (grouped data) – find missing frequencies
29	D	Probability	2 mk	SA-I	Cards removed from deck – probability of red/face card
30	A	Pair of Linear Equations	3 mk	SA-II	Solve pair – Elimination method / Substitution method (OR)
31	A	Quadratic Equations	3 mk	SA-II	Solve – Factorisation method / Quadratic formula (OR)
32	A	Arithmetic Progressions	3 mk	SA-II	Word problem – find number of terms (rows/objects)
33	B	Areas Related to Circles	3 mk	SA-II	Area of sector – difference on increasing radius
34	B	Triangles	3 mk	SA-II	Prove a relation using similarity (proof-based)
35	C	Introduction to Trigonometry	3 mk	SA-II	Prove a trigonometric identity

Q.No	Sec	Chapter	Marks	Type	Topic / Skill tested (short)
36	C	Applications of Trigonometry	3 mk	SA-II	Heights & distances – two angles of depression
37	D	Surface Areas & Volumes	3 mk	SA-II	Combined solid (cylinder+hemisphere+cone) – cost of painting
38	D	Logarithms	3 mk	SA-II	Evaluate expression using logarithm method
39	B	Coordinate Geometry	3 mk	SA-II	Parallelogram vertices – find unknown & diagonal length
40	D	Statistics	4 mk	LA	Mean by Step-Deviation method (grouped data)
41	A	Pair of Linear Equations	4 mk	LA	Word problem (speed-time-distance) forming pair of equations
42	A	Quadratic Equations	4 mk	LA	Word problem forming quadratic equation (cost/rate type)

Notes:

- Chapter **Constructions** is fully deleted for Level 1 & Level 2 (2026–27 rationalised syllabus) — excluded entirely from worksheets.
- Q30, Q31 each carry an internal OR choice (two methods of solving the same chapter) — worksheets should give practice in *both* methods.
- Q22, Q23 also carry an internal OR choice between two sub-skills of the same chapter.
- Marks-to-question-type is fixed by the Board's blueprint: e.g. Applications of Trigonometry (Ch 9) *only* ever appears as a 3-mark SA-II question — so its worksheet will contain only 3-mark height/distance problems, never a 1-mark VSA.
- This mapping is the single source of truth for all future worksheet generation across Sections A–D.
